

Mark-Costello Waste Sterilizers

AS621DD (Double Door) w/Steam Jacket and vacuum pit-installed at a commercial waste processors plant utilizes optional hydraulic draw bridge to load carts.

AS510 with vacuum and touch screen controller installed at dock with self-contained compactor for waste and stationary compactor for OCC.

Installed at an International Airport-our model AS515 Hi-Volume/Stainless with vacuum treats international flight waste seven days a week-24 hours per day.

These AS515 units with optional Double Doors installed at a large regional California hospital meet the demand for reliable and dependable waste equipment.

With optional hydraulic cart lift, loading and unloading carts into this AS58 installed at a Midwestern Hospital simplifies material waste handling.

Equipped with optional cart ramp this AS510 installed at a Regional medical center allows carts to be easily loaded into sterilizer.
